

PV-50

Protectors
Road protector

Our **Road Protector** is primarily a safety system for motorcyclists.

Its double-wall design with a shock-absorbing inner air chamber contributes to avoid severe wounds and amputations in accidents, caused by the cutting edges of the IPN beams.

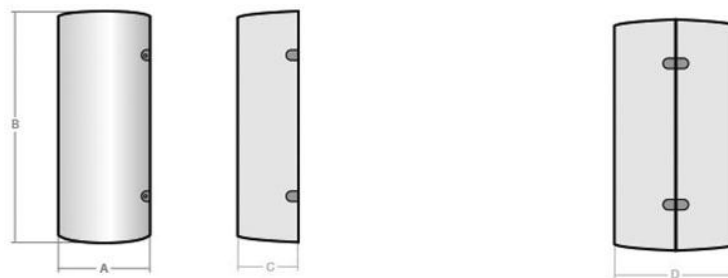

Manufactured with high density polyethylene + Ultraviolet stabilizer, non-degradable waterproof and resistant to extreme weather conditions and sudden temperature changes.

A simple and easy to assemble system that can avoid irreversible damage.

MATERIAL: HDPE
